Portfolio — atharvapatil.tech

PROFESSIONAL SUMMARY

Software engineer and product builder focused on **desktop applications, developer tools, operating systems, and creative technology**. Founder of **Northbyte Studios** — an independent studio building privacy-first, practical products with zero telemetry and long-term maintainability. Ships end-to-end: product direction, interface design, engineering, testing, documentation, release. Currently building an encrypted vault, two Linux operating systems, and a general-purpose programming language, all under one studio and one pair of hands.

PROJECTS

Nexus · Encrypted Personal Vault

Founder, Lead Engineer, Designer — github.com/p4inz-code/nexus-desktop · Jun 2026 – Present · Windows · C# / .NET 8 / WPF

- **Cryptographic core:** AES-256-GCM over NXG1 container, Argon2id key derivation, Windows Hello unlock, in-app SHA-256-verified updater, portable mode.
- **Trust posture:** zero telemetry, zero cloud, zero sync. Encrypted at rest, decrypted only in memory while the vault is unlocked.
- **v11 UI overhaul in prep:** visual system rebuilt across lock screen, media browser, credential + note detail, settings, updater. Security architecture unchanged.

Mission OS · Privacy-First Linux Distribution

Founder, Designer, Systems Engineer — github.com/p4inz-code/mission-os · 2026 – Present · Debian Stable + KDE Plasma · QML / Qt · GPLv3

- **Four pillars applied to the OS itself:** privacy-first, security-conscious, portable-first, offline-first. Every advanced installer option explains its benefits, limitations, and trade-offs in the same view as the toggle.
- **141 / 141 pixel checks** passed on installer foundation. 14 CTest tests, 13 runtime suites. Accessibility, keyboard, theme, reduced-motion validated pre-ISO.
- **Interactive concept demo** at atharvapatil.tech/mission-os/demo.

Kanvaz · Visual Reference Workspace

Founder, Sole Engineer + Designer — github.com/p4inz-code/kanvaz · Jun 2026 – Aug 2026 · Electron · MIT

- **Plugin system** with main-process consent — plugins register card types, ship themes, add Settings panels. Theme Creator ships as reference plugin.
- **Safer container:** .kanvaz zip with per-asset SHA-256 integrity hashes. Detects tampering on load. **Final release v4.2.2.**

Pursue OS · Investigation-Focused Linux OS

Founder, Sole Developer — github.com/p4inz-code/pursue-os · 2026 – Present · Linux · Apache 2.0

- Purpose-built for OSINT / DFIR / evidence collection. Two flagship surfaces: Investigation Terminal + Investigation Browser with integrated Tor. AI assists, never authorises.

Veris · Security Investigation Platform

Founder, Sole Engineer — github.com/p4inz-code/veris · Jun 2026 – Present · Windows · TypeScript / Node.js / SQLite · Pre-v1.0.0

- **Deterministic analysis engine — no black-box AI scoring.** AI is read-only explanation over the deterministic core. **3,100+ automated tests.** Offline-first.

Also shipped · Obscura · MINK · repo-map

Sole engineer across all three

- **Obscura** — Lua AST toolkit for Roblox, v1.0.0 with 340 / 340 tests. MIT. · **MINK** — general-purpose programming language, in design. · **repo-map** — Engineering Intelligence CLI on npm as [@p4inz-code/repo-map](https://github.com/p4inz-code/repo-map), 870+ tests, on hold at v2.2.0.

EXPERIENCE

Northbyte Studios — Founder & Independent Software Studio

2026 – Present · Navi Mumbai, India (remote-friendly)

- **Full-cycle ownership:** product direction, architecture, engineering, UI / UX, testing + QA, documentation, branding, release engineering — all by one person.
- Every ship holds to a fixed principle stack: **no telemetry, no cloud lock-in, explain the trade-off on-screen, free-forever when it can be, one person whole product.**

Freelance — Web + UX + Brand + 3D / VFX

2025 – Present

- Independent client work: web dev, UI / UX, visual identity, 3D / VFX visualization. Notable: full production website build for a performing-arts academy. Scope shapes: short-loop (1–2 wk fixed), product build (4–8 wk), studio work (shot-scoped).

TECHNICAL SKILLS

Languages	C#, C / C ++, TypeScript, JavaScript, HTML, CSS, Lua / Luau, Bash
Frameworks & Platforms	.NET 8, WPF, Avalonia UI, Electron, Node.js, Astro, Qt / QML, Debian Linux, Windows
Cryptography & Security	AES-256-GCM, Argon2id, LUKS2, TPM, Secure Boot, Windows Hello, deterministic analysis engines
3D / VFX	Blender, Substance, DaVinci Resolve, lighting studies, product renders, motion / camera work
Tools & Workflow	Git / GitHub / Actions, VS Code, Visual Studio, FFmpeg, npm / pnpm, Cloudflare Pages

EDUCATION

B.Sc. Animation — D. Y. Patil University, Nerul, Navi Mumbai · 2025 – 2028 · Second year in progress (2026 – 2027)
